Candise Littwin

Machine Learning Engineer

Dear Zahra Hoiness,

I am writing to express my interest in the Machine Learning Engineer position at Google, as advertised. With a solid foundation in machine learning, software engineering, and data analysis, honed over five years at Amazon, I am excited about the opportunity to contribute to Google's innovative projects that shape the future of technology.

At Amazon, I was part of a dynamic team where I developed and deployed machine learning models that scaled across millions of customers, directly contributing to the enhancement of user experience and the streamlining of operational processes. My role required a blend of technical expertise, creative problem-solving, and collaborative teamwork, all skills that I understand are highly valued at Google.

One of my key accomplishments at Amazon was leading a project that utilized deep learning to improve the recommendation system, which resulted in a 15% increase in user engagement. I also actively contributed to the optimization of our machine learning pipelines, reducing computational costs by 20% without compromising on model performance. These experiences have equipped me with the knowledge and the agility to tackle complex challenges, adapt to evolving technologies, and drive impactful solutions.

I am particularly drawn to Google's commitment to innovation and its inclusive culture that fosters growth and learning. I am eager to bring my expertise to your team, where I hope to not only grow as a Machine Learning Engineer but also contribute to Google's mission of organizing the world's information and making it universally accessible and useful.

Thank you for considering my application. I am looking forward to the opportunity to discuss how my experience and skills will be beneficial to your team at Google.

Warm regards,

Candise Littwin
